MAGAZINES

US Black Engineer & Information Technology

Hispanic Engineer & Information Technology

CCG's Women of Color Magazine

Science Spectrum

Our publications exist to provide coverage for the ongoing activities and outstanding achievements of minorities and women in the science and technology enterprises, coverage sorely lacking in the mainstream media.

Annual recognition lists published in Career Communications Group's magazines include the "50 Most Important Blacks in Technology" and "Modern-Day Technology Leaders," named annually by the editors and honored at major events during the Black Engineer of the Year Awards Conference; the "50 Most Important Hispanics in Technology," reported each year in *Hispanic Engineer & Information Technology* magazine and honored at the *Science Spectrum* Magazine Conference on Minorities in Research Science; *CCG's Women of Color Magazine's* "Women Who Make a Difference" and "Rising Stars," recognized during an awards luncheon in Atlanta; and others.

AWARDS CONFERENCES

Science Spectrum Magazine Conference on Minorities in Research Science

An annual event honoring excellence among minority and female workers in "hard sciences"; space and astrophysics; health science; environmental and ocean science; pharmaceutical and human genome research; agricultural research, food science, and textile sciences; and climate and weather research.

National Women of Color Technology Awards Conference

An annual celebration of the achievements of minority women in technology and a prime meeting place for personal sharing among female executives, top managers, experts, and students.

Black Engineer of the Year Awards Conference

A premier Black History Month event recognizing outstanding engineers, the Black Engineer of the Year Awards provide career development resources for Black professionals and powerful inspiration to Black youth nationwide to pursue careers in technology and science.

PUBLIC AWARENESS CAMPAIGNS

La Familia Technology Week

A national, community-based public awareness campaign held each year in October during Hispanic Heritage Month. La Familia's goal is to bring Hispanics into the U.S. mainstream in ownership of, access to, and quality-of-use of computers and information technology.

Black Family Technology Awareness Week

The Awareness Week is aimed at helping Black families empower themselves and their communities by taking full advantage of new technologies that can significantly improve their quality of life. Held each year during Black History Month.

Native American Family Technology Journey

Helping Native American communities progress by closing the "Digital Divide."

Broadcast and Video

"Success Through Education": A nationally syndicated television program, hosted by stage and screen celebrities, that encourages minority youth to find their dreams by completing high school and college.
